

Ответы на задания:

Задание 2

CORS — это политика безопасности браузера и в node js она отсутствует, поэтому ошибок в терминале нет. CORS требует специальный заголовок для браузера с разрешением на работу. С axios мы получаем доступ к vk (как сайт обращается к сайту).

Задание 3

В отличие от VK geoip.... содержит этот заголовок поэтому ошибки нет.

Задание 5

В заголовках есть параметры, которые управляют разрешенными http запросами, cookies, разрешенные http/https и другое.

The screenshot shows a web client interface with a GET request to `https://vk.com`. The response is a 200 OK status with a response time of 225 ms and a size of 60.71 KB. The response body is displayed in HTML format, showing the beginning of an HTML document with various meta tags.
